

DSC

Receiving Antenna

for IC-M710GmDss; IC-M802; IC-M801/GmDss

- active broadband antenna for the reception of long - , medium & short-waves; VHF and UHF Bands; (Navtex & DSC)
- complete frequency range from 30 kHz to 550Mhz
- greater amplification for higher frequencies = better receiver sensitivity on VHF frequencies, little interferences on HF frequencies
- 360° reception as of vertical polarization
- compact, only 40cm long, 35mm diameter
- sturdy steel design, long term weatherproof
- different clamps and brackets for mounting available
- three different remote controller available:

DX-500/1 for 12V operation (one receiver outlet)

DX-500/2 for 12V operation (two receiver outlets)

DX-500/3 for 12V operation (three receiver outlets)
